

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light green. They are positioned diagonally, with the blue one partially covering the green one.

Personal Project

Dominic O'Donnell

Hurricane on Water VFX

I would like to create a scene from a hurricane, involving a ship.

I recently read a book about the discovery of bermuda in 1609, on the “sea venture”. The sea venture was a a Seventeenth Century English ship headed for jamestown in america.

The story tells us in old english about the destruction of a ship within hurricane winds, where sailors were deserted on the island of bermuda, managing to find refuge on the island.

Concept

A Liquid Simulation aiming for 15 seconds

I want to focus on the ship and not introduce characters specifically although potentially showing movement and panic on the ship, but i need to look into this.

Waves crashing

Wind blowing

Cloth simulation

Rope simulation

Material shaders

Weather Effects

Simple camera movement

Boat Model

Programs

- Maya for water
- Houdini
- Unreal engine
- Rain in a compositor (AE or Nuke)
- Element 3D

Aspects to consider

- Movement of Boat must be cohesive to the water
- Movement of sails must be cohesive to wind
- Wind and Rain must be in sync
- Water and Sea must look angry and powerful
- Splashes coming off of the boat
- Sky in the background looking moody and hurricane esque
- Color correction
- Sound FX
- Lightning
- Liquid simulations
